Services, Research, Engineering, Testing and Product Development That Make ResinDek® More Than Flooring!

Cornerstone Specialty Wood Products makes it easy for you to get accurate specifications, drawings and quotes when planning and building your mezzanine floor.

Layout Drawings

When you need assistance in planning and estimating your mezzanine floor, Cornerstone Specialty Wood Products' engineering department can provide you with drawings that optimize materials and provide various quotes with different ResinDek® panel grades.

As you move into the installation process additional drawings and instructions are available to assist you with error free installations. Installation instructions are currently offered in English, French, Spanish and Portuguese.

Testing & New Product Development

There is always a product test being done in the engineering department at Cornerstone Specialty Wood Products either on-site or off-site. Cornerstone Specialty Wood Products' team never stops evaluating and testing new approaches for mezzanine floors.

With this capability several clients have solved existing problems and new challenges with the help of Cornerstone Specialty Wood Products', "we can do that better" attitude.

On-Site Installation Assistance

Unlike other companies our assistance doesn't end with the arrival of your mezzanine flooring product.

Whether it's a complex project or just getting you started, we want your ResinDek® panels installed correctly and to 100% of your satisfaction.

10-Year Product Warranty

The ResinDek® 10-Year product warranty is above all the rest in the industry, because it keeps you protected after the installation (when installed, loaded and maintained properly).

ResinDek® has been installed in place of several other options because competitors would not stand behind their own mezzanine flooring products. That's okay with us — we like helping out and leaving a beautiful mezzanine floor behind.

Global Presence

Cornerstone Specialty Wood Products has recently sold and delivered ResinDek® flooring to Argentina, Brazil, Canada, Chile, France, Germany, Ireland, Mexico, Panama, Peru, Romania, United Kingdom and Scotland.

We prepare AutoCAD® drawings for each container shipped to optimize panel sizes and loading to reduce freight costs.

We take photos of every loaded container prior to shipment, for shipping and receiving convenience.

Custom shipping documents are prepared for every container to insure accuracy and to indicate product location clearly.

If we don't have someone at your location to assist you, we will find someone that has been trained by our team in installations and trouble-shooting or make the trip ourselves.

ResinDek® 3E Benefits

ResinDek® panels have been developed and designed to be environmentally responsible, ergonomically friendlier during installations and for working on after installed. Economically ResinDek® saves you money because of the options and durability of the product.

We strongly believe that mezzanine flooring is more than just a panel for experts, it's a panel of expertise that you receive when purchasing ResinDek®!
